Vol. 10, No. 49

Here's an outside shot of the Leaming Center, nearing completion, and an inside view of the new monumental staircase and skylight.

## No football team this year

by Mike Kaika

Due to the lack of players, Gallaudet College has decided to suspend its varsity football team for the 1980-81 academic year. When the call for football players was announced at registration time only 35 men signed up, and during practice sessions over a two week period, player attendance varied between 35 to 18 players. To have a viable football program 40 plus players are needed and on a consistent basis.

The coaches, along with E. Ronald Dreher, chairman of the Physical Education Department, the College Athletic Council, and athletic directors observed practice sessions and had a meeting with the football players before making the tough decision to suspend football for this year only. The decision was necessary to avoid risk of serious injury to the players.

"Although we don't have a football team this year," commented Dreher and Joe Fritsch, men's athletic director, "Homecoming is still on for Oct. 25." In place of football, the highly talented and successful soccer team is scheduled to

play the Mississauga Mohawks. The traditional Homecoming festivities will take place as usual according to the Student Body Government, and will still be a gala event. The Athletic Department is considering a 10 mile (or less) marathon race for anyone who wishes to participate. SBG is planning the parade, float, homecoming queen and evening programs and the Gallaudet College Alumni Association will have tours of the Alumni House project in the morning followed by a brunch. More details will appear later as plans are finalized.

This is not the first time the College will be without a football team. Football was officially organized in 1883 and a team was fielded from that time until 1938 (except for 1887). No football teams were fielded from 1938 until the fall of 1947, when football was once again reestablished until this year. The 10 year lapse was largely due to the depression and World War II.

Also, in the fall of 1971 the football team was in jeopardy of having its season

*continued on page 4*

## Professional Day set for Sept. 30

Students, faculty and staff are invited by Committee S (Self-Study) to participate in Professional Day Tuesday, Sept. 30, 1980. The topic will be "The Gallaudet Self-Evaluation Report," draft copies of which were distributed recently. Committee S hopes that everyone will take time to read the report before Professional Day. Discussions that day will offer an opportunity to provide feedback on the report, which focuses on graduate programs and the effects of the reorganization on campus.

The opening session, in Hall Memorial Building, Room 213 (with an overflow room across the hall) will begin at 9 a.m. Speakers will be Edward C. Merrill, Jr., Robert Davila, Doin Hicks, Tom Mayes and John Schuchman who will comment briefly on "Reorganization: Purpose, Current Status, Concerns." A question and answer period will follow. After a coffee break, discussion groups will center on five broad areas of the report. These groups will then be repeated, giving people an opportunity to share their views in a different group.

A free box lunch for faculty and staff members, provided courtesy of the Division of Academic Affairs, will be served at 1 p.m. in the Cafeteria, second floor. A multi-media slide presentation on Gallaudet is the luncheon program. Flyers advertising the day, listing the discussion questions and giving instructions for getting lunch tickets have already been distributed.

A wrap-up session will begin at 2:45 p.m. Group discussion leaders will report on comments, suggestions, etc., relative to the Self-Evaluation, that surfaced during the morning sessions. Committee S will incorporate relevant material into the final report for the Middle States Accreditation Team.

Professional Day is a real opportunity for faculty, staff and students to become involved in matters of vital concern on campus. Committee S and its subcommittees have been working on this report for more than a year. Broad participation in the form of constructive response is very valuable as a reflection of the opinions of the entire College community.

Linda Alprin checks out PRECISE information at the Computer Center.

## Pre-College gets new info system

PRECISE is a statement of the major goal as well as the name of a new employee information system currently being used by the Division of Pre-College Programs.

The Pre-College Information System for Employees (PRECISE) is basically a computerized employee handbook, with information on policies, procedures and services—everything from how to access buildings to sick leave. Because it is computerized, the system can be updated frequently and easily, thus providing the user with more precise information than a traditional printed handbook.

PRECISE was designed by Linda Alprin, a consultant to Pre-College, with

the help of Jim Bourg, who implemented the SIRE/G program used for computerized information retrieval of bibliographic data in the Library. Like SIRE/G, PRECISE makes use of Gallaudet Computer Center facilities.

Currently the system is 66% complete, with 14 sections and 279 items. By Thanksgiving, 18 sections containing about 350 items will be completed. Of these sections, seven have College-wide application, while the rest concern in-house Pre-College information.

If you have any questions regarding PRECISE, please contact Alprin at x5258 or drop her a note at KDES, PAS 6.

# Serendipity

## Library Bits & Pieces

### Library Committee on International Relations

The Library Ad Hoc Committee on International Relations was formed in April, 1980 to consider the Library's current and possible future services to the international community both here and abroad, emphasizing the mutual benefits of exchange of information. The committee held discussions with Library staff members, Gallaudet students, the Visitor's Center, Eli Savanick, acting director of the International Center on Deafness, and Toni Rees, foreign student advisor. A questionnaire was distributed to the Library staff.

After exploring a wide range of possibilities, the Committee narrowed its focus to several specific projects. These projects developed in the general categories of exchange of materials with educational institutions serving the deaf abroad, Library support for foreign students on Gallaudet campus, assistance to foreign visitors to the Library and cooperation with other campus organizations in projects of an international character. As a result of these considerations, the committee made the following recommendations to the Library staff:

1) That specifically selected withdrawn periodicals be included with the withdrawn books currently being sent abroad.

The committee supports the long-standing Library project of sending selected withdrawn books to educational institutions for the deaf in other countries. The librarian in charge of this project should make selections from the withdrawn periodicals and send these along with the books. The Library would be providing a much needed service by sending recent periodicals and would be supporting the College's commitment to international exchange of information.

2) That the Library extend its service to foreign students on campus by obtaining subscriptions to foreign newspapers/periodicals.

A yearly analysis should be done of the geographic distribution of foreign students and newspapers be subscribed to on the basis of this analysis. The Library should subscribe to a publication (newspaper or periodical) of national scope from the country (countries) represented by significant numbers of foreign students. For those students fewer in number, the possibility of obtaining gift subscriptions from embassies or other organizations could be considered. The Library should also try to get newsletters or other publications from the educational institutions for the deaf in the countries represented by foreign students on campus.

3) That a member of the public services staff be responsible for displays/bulletin boards, regularly including information on other countries and cultures.

A member of the staff should be responsible for organizing these displays on a regular basis. Emphasis should be on schools for the deaf, deaf individuals, etc. in other places as well as about geographic areas in general, perhaps considering those countries represented on campus by foreign students.

4) That a staff member within the Library consciously maintain contact with the International Center on Deafness.

The Library should have a specific contact person who would maintain a current awareness of ICD projects. Eli Savanick of the ICD expressed his appreciation that the Library had shown an interest in international relations through this committee.

Through the questionnaire distributed to the Library staff, the committee compiled a list of language abilities of staff members. The list should be used to assist visitors and help with Library correspondence.

The committee is currently studying the feasibility of these recommendations before assigning or implementing the stated tasks. For more information, contact Nadav Katz, Regina Feldman, Gail Wadsworth or Pete Hibbert in the College Library.

### NCI announces captioned programs

The National Captioning Institute has announced that it will close caption many of the most popular shows on ABC, NBC and PBS this fall season for hearing impaired viewers. In addition to the network programming, NCI will caption specials and commercials for 19 advertisers, various syndicated programs and several hundred hours of programs for the US Department of Education.

"We will be captioning 22½ hours of programs each week for ABC, NBC and PBS by the end of 1980," said John E.D. Ball, president of NCI. "We started with 16 hours last March, so we have increased the amount of closed-captioned programming by 40%. When we add the captioned programming we are doing for advertisers and syndicators, the number of hours should be closer to 30 each week by the end of the year."

The roster of shows to be televised by NBC this fall includes five hours of closed-captioned shows each week: "Little House on the Prairie," "Disney's Wonderful World," "Diff'rent Strokes" and "The Sunday Big Event."

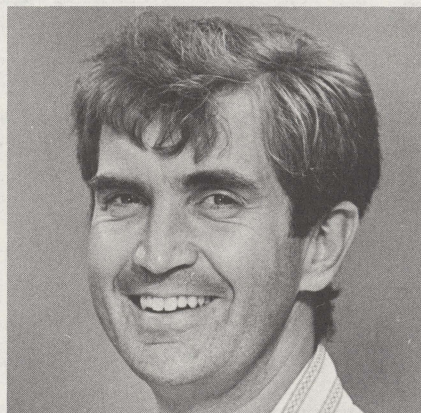

ABC will also broadcast five hours of

closed-captioned programming each week: "The Friday Night Movie," "Three's Company," "Barney Miller," "Eight is Enough," and "Love Boat."

PBS has scheduled 12 hours per week of closed-captioned viewing by the end of the year. The following shows will be broadcast with captions: "Cosmos," "Masterpiece Theatre," "Once Upon a Classic," "From Jumpstreet," "Great Performances," "The Body in Question," "Here's to Your Health," "Connections," "Nova," "Soundstage," "Up and Coming," "3-2-1 Contact" and "Over Easy."

Closed captioning has become a popular vehicle for several major television advertisers. Procter & Gamble, Sears, Roebuck and Co. and Kraft, Inc. have all announced that they will have their first-run specials captioned by NCI.

NCI also recently signed a three-year contract with the US Department of Education to close caption 600 hours of programming. All the programs will be made available to schools around the country and many will be broadcast by PBS.

Gregg Reynolds

### Reynolds promoted

Gregg A. Reynolds has been promoted to the position of director of Design and Construction to fill the position vacated by Tom Lillis, who has accepted a position with a university in the DC area.

Reynolds has held the position of assistant director for Construction. He came to Gallaudet in October of 1977 from a local mechanical contracting firm, where he served as project manager. His educational experience includes a BS in Mechanical Engineering from the University of Wisconsin and a masters degree in Finance from George Washington University.

Reynolds' duties in his new position include responsibility for facilities design and construction management on a campus-wide basis. In this position he is the spokesperson for Gallaudet College in dealing with architects, engineers, construction management firms, other consultants and contractors for all design, construction and renovation of facilities on campus.

### Watch Channel 2

"The World of People," a WMAR-Channel 2 program with a magazine format similar to "PM Magazine," will feature a Gallaudet student on its program this Friday, Sept. 26 at 10 a.m.

The Baltimore station did a feature on a sign language musical group from Pittsburgh, called "Breakthrough," when they performed on the Ellipse. That segment will be tied in with the new student orientation at Gallaudet. The focus will be on Susie Wilding, a junior from Utah, who was a peer advisor for her second year in a row.

### Tennis, anyone?

All members of the Gallaudet community—faculty, staff and students—are invited to participate in a pyramid tennis tournament to determine who's the best player on campus.

Deadline for registering is Sept. 29, and the competition will get started shortly after that and continue through this semester.

The event is being organized by Blair Bowman, a PE major here, with the assistance of Lloyd Greene, men's tennis coach, and faculty member Joe Kinner.

A list of the rules, a place to sign up and additional information about the competition are posted on the bulletin board across from the training room in Hughes Gym. If you'd like to register or for more information, call Lloyd Green in the Student Life office, x5747 voice or x5749 TDD.

### Sign symposium

The National Symposium on Sign Language Research and Teaching will be held in Boston Oct. 26-30.

The Department of Sign Communication is arranging for bus transportation to the Symposium. Members of the campus community are invited to ride along at a cost of \$50 roundtrip. Please phone in your request to Dotti Hazen, x5632 before Sept. 26.

Announcements which include a registration form for the conference may be obtained from the National Association of the Deaf, Silver Spring, Md.

### Pre-Inventory Sale

at the Bookstore

25% off

on all clothing, supplies  
and sundries while stock lasts.

Sale continues now through  
Thursday, Sept. 25

### Sponsored R&D

#### Grant/contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities for Kendall Green faculty, staff and graduate students. The deadline is followed by an abbreviation of the federal agency and the program title. More details on programs of interest can be obtained from Glenn Pfau, Office of Sponsored Research, x5030 (Voice or TDD).

Deadline	Program
10/12/80	OSE—Handicapped Research and Demonstration Program: Student Research Grants
10/13/80	NEH—1981 Summer Fellowship Stipends for Faculty
10/15/80	OSE—Handicapped Personnel Preparation Grants
10/21/80	NIE—Grants for Research on Institutions of Post-secondary Education
10/22/80	DE—Special Services for Disadvantaged Students Grants
10/31/80	OSE—Handicapped Research and Demonstration Field Initiated Studies Grants
11/01/80	NICHHD—Developmental Aspects of Nutrition
11/01/80	NIA—Social and Behavioral Aging Research

### Weekly program highlight

The National Endowment for the Humanities has announced Dec. 1, 1980 as the next deadline for consultant grants. The grants are designed to help postsecondary institutions evaluate alternatives to problems in their humanities curricula. Consultant grants enable institutions which are in the early stages of planning new programs, or in the process of reconsidering existing curricula, to employ the services of an experienced consultant, chosen by NEH.

Applications for NEH consultant grants have a high success ratio of approximately 87%. In FY 1980, 140 applications were submitted and only 12 were rejected. NEH encourages the submission of draft proposals eight to 10 weeks in advance of the deadline. For more information contact Janice Litwin, Program Officer, Education Division, NEH, 806 Fifteenth Street, NW, Washington, DC 20506, (202) 724-1978.

# President's Office Notes

## Trustees study Division of Research

The Division of Research is involved in a variety of studies including but not limited to learning, sign languages, human development and speech and hearing. Recognizing the unique role research plays in improving education for deaf people, the Board of Trustees chose to study this topic in their first annual retreat Sept. 5-7 on Kendall Green.

The retreat formally began on Friday evening, Sept. 5 with a dinner and guest speaker. Members of the Board, the Central Administration and the Division of Research heard Dr. Marvin Herscher, executive vice president for Threshold Technologies, Inc. speak on "The State of the Art in Speech Communication Technology."

On Saturday, participants reconvened at 8:30 a.m. for a day of presentations by the Division of Research. Edward C. Merrill, Jr. and Doin Hicks, vice president of the Research Division, welcomed the Board of Trustees. Hicks began the formal information sharing with quotations from Goal #16 of *New Challenges, New Responses*: "Gallaudet will greatly expand its commitment to basic and applied research and seek to become a major research facility specializing in problems of deafness." He also shared the sub-goals listed in conjunction with Goal 16, including establishing a Research Institute, encouraging faculty research and seeking funding for research projects.

Glenn Pfau, director of the Office of Sponsored Research, shared a paper with the Trustees on "A Conceptual Plan for Research Stimulation and Outreach." This publication explores means by which the Division could stimulate and support research by persons outside the Division and represents an effort to consider new thrusts in this area.

Raymond Trybus, dean of the Research Institute, gave the Trustees some statistics related to the deaf population and shared some applications of research that has benefited deaf people:

- Recognition of American Sign Language as a language worthy of scholarly study.
- Cued Speech adapted for use in 31 oral languages.
- Adapted Stanford Achievement Test for testing 40,000 deaf children annually.
- Developed Signed English—most used system by young deaf children in US.
- Established the recognized demographics of hearing loss in children in US and Canada.
- Research on speech communication for hearing impaired is world renowned.

One concept raised by Trybus at various points throughout the day was that of researchers as a "unique breed" of individuals. Many times, for example, a researcher may spend years studying one or perhaps several aspects of a problem; the degree of single-minded concentration and patience required is unusual.

A new publication, *Research at Gallaudet College*, was presented to the Board. (This publication will soon be distributed to the Gallaudet community.) The Board used the publications as a reference as each research unit on campus was described by Trybus and each research unit director.

Briefly, the work of the units is as follows:

Educational researchers located in MSSD and KDES work to find methods that can result in higher levels of educational achievement for deaf students.

- The Learning and Cognition Studies group, headed by Tad Uno, takes a number of approaches in ways in which deaf students learn.
- The Child Development Studies group, headed by Kathryn Meadow, focuses on the psychological and social development of hearing impaired people from infancy to adulthood.
- The Assessment and Teaching Studies Group, headed by Donald F. Moores, investigates testing and other methods of assessing deaf students, as well as interac-

tion between deaf students and their teachers.

The Linguistics Laboratory, located on the third floor of College Hall and headed by William Stokoe, studies American Sign Language and its use in the deaf community.

The Office of Cued Speech Programs, directed by Orin Cornett, is also located on the third floor of College Hall. The work of this group involves service, research and development of materials on Cued Speech, a system of hand cues designed to represent spoken language and to help hearing impaired persons to speechread.

Barbara Brauer will head a new Mental Health Research Program which will study issues in mental health services for deaf people.

The Sensory Communications Research Laboratory, located in the basement of the Mary Thornberry Building, studies the speech and hearing of deaf people, with the goal of improving sensory aids to communication, such as hearing aids. James M. Pickett is director of this lab.

The Signed English Research Program is evaluating the effectiveness of Signed English, a system designed by Harry Bornstein and his staff as a visual representation of English, based on ASL. The Signed English program currently is located in Hall Memorial Building.

The Office of Demographic Studies provides information, on a national and international basis, about the large majority of school aged hearing impaired children in the US. ODS, located in House #4, is directed by Michael Karchmer. Assistant director is Stephen Wolk.

As the meeting drew to a close, Hicks reviewed with the Board the funding resources of the Division. He shared with them a paper that outlined alternatives for funding in the future and invited their advice in this area as well as for the overall work of the Division.

The Board of Trustees met Sept. 7 to review the information received during the weekend and to formulate recommendations.

## New Kendall principal

Ken Titkin has recently joined Gallaudet as the new principal of the Kendall Demonstration Elementary School.

He earned his BA and MS in Speech and Hearing Rehabilitation from Adelphi University, Garden City, NY.

Titkin became a speech therapist and worked with the BOCES program in New York. Later he moved to Miami, where he taught deaf people, was an assistant principal in Dade County Public Schools and most recently was the supervising administrator for the Exceptional Student Center in Dade County. That center included all types of children, including hearing impaired, mentally retarded, blind, etc.

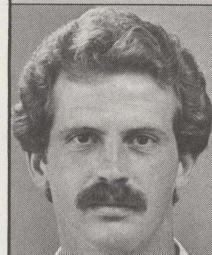

Ken Titkin

There have been three recent promotions in the Accounting Department. **Suzanne Baker** is General Accounting supervisor, **Claudia Harris** is Accounts Payable supervisor and **Susie Duppins** is Payroll Department supervisor.

## Personalities

**Gary Hotto** is a counselor with MSSD Clinical and Support Services. He will be counseling MSSD students and teaching a course in self-understanding. Hotto is a May, 1980 graduate of Gallaudet's MA program in School Counseling and before coming here worked four and a half years as a residential counselor at the Rochester School for the Deaf in NY.

Hotto

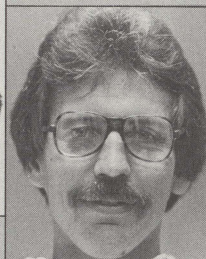

Weiner

**Steve Weiner** is also a counselor with MSSD Clinical and Support Services, responsible for counseling and career planning. He received his MA in Counseling of the Hearing Impaired from Gallaudet in 1980 and his BA in Psychology and History in 1978, also from Gallaudet. He has worked as a resident assistant at Gallaudet and a personal counselor in California.

Rohr

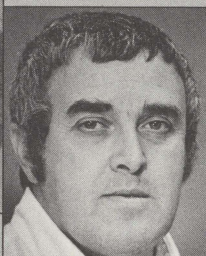

Ulissi

**Cindy Rohr** is an English teacher at MSSD. She has previously taught at the Maryland School for the Deaf in Frederick and worked as an interpreter at the University of North Colorado, Western Maryland College and freelance in this area. She has her MA in Reading Education from Western Maryland College.

**Stephen Mark Ulissi** is a psychologist at KDES. He will be doing psychological testing, counseling hearing impaired children and families and teacher consultation. Ulissi has his PhD in Clinical Psychology from the University of Mississippi and has interned at Camarillo State Hospital in California and served as a postdoctoral fellow in Pediatric Psychology at the University of Oklahoma Health Services Center.

Lewis

Emerson

**Nancy Jones Lewis** is a resident advisor with the MSSD Resident

Program. A former ASL instructor at New York University, she received her MA with the Department of Counselor Education from New York University.

**Herbert C. Emerson** is a new police officer with Safety & Security. He comes here with 20 years with the Metropolitan Police Department and holds the AA and BS degrees from American University.

Taylor

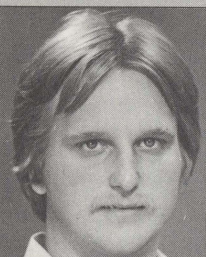

Burgess

**Ronald C. Taylor** is also a police officer with DOSS. He spent four years as a US Army Military Police officer and was also a Prince Georges County coordinator for emergency preparedness with PG Hospital Security. He has a BA in Criminal Science from the University of Maryland.

**James D. Burgess** is a new employee with the Grounds Department.

Foster

Holcomb

**Mary Lou Foster** is a store attendant with Physical Plant. She previously worked as a bookkeeper with Accounts Payable.

**Thomas K. Holcomb** is a student recruiter with the Admissions Office. He just graduated from Gallaudet last May.

**Grace Powell** is now an administrative secretary with the School of Education and Human Services, responsible for managing the office. She has a BA from Catholic University and formerly worked with University Research Corporation here and May Co. Real Estate Office in LA.

**Florence Scott** is a new secretary with the Community Service Center. She attended business college for two years, has ASL skills and has previously worked as a secretary.

**Marc Schweitzer** is an electrician with Electrical Services. He attended Virginia Apprentice School and has worked in construction for 10 years, from apprentice to job foreman.

## MSSD wins again

**Joey Vincent** of MSSD catches the ball on the 24 yard line for a first down. MSSD romped to a 32 to 16 victory over Colonial Beach HS last week for their second win in as many outings this season. Last Friday's victory was the 13th consecutive win by the MSSD football team. Last year the team went undefeated.

## Football

continued from page 1

suspended after several games. Injuries and attrition reduced the team from 40 plus men to only 27 men. When the coaches were considering cancelling the remaining games, the 27 men, showing true heart and spirit, made it be known they wanted to finish the season. They did (except for the very last game which was cancelled) and as the season progressed they were dubbed the "Dirty 30" (27 players plus three coaches).

It will probably interest you to know that the entire athletic program prior to 1947 was entirely funded, organized and maintained by Gallaudet College students. Not one dime came from the College coffers. Athletic uniforms and equipment were purchased with money from the students' pocket or student fund raising events and coaches were interviewed and hired by students. When Dr. Elstad became president of Gallaudet College in 1945, he saw the need for the College to subsidize the athletic program and today virtually the entire Athletic Department is funded by the College.

Why the apparent lack of interest in football this year? According to Dreher and Fritsch, there are no definite answers. Dreher commented that "this is not the

demise of football and we intend to field a football team next year." It is doubtful that the lack of a football team this year will have any adverse effect on the other 17 sport programs available to our men and women students. Joe Fritsch feels that it will probably produce a "positive effect on the other sport programs."

The students reaction to football being suspended this year appears to be rather subdued. Some were disappointed or saddened but no "hell raising" was heard nor was the College criticized in making the decision to suspend football for one year.

A special committee has been established to look at the problem about football and will submit their findings and recommendations to Dreher by this December. Don Padden, long time member of the faculty and former chairman of the P.E. Department will chair the committee which will be composed of students, faculty, staff and alumni.

Padden plans to divide the committee into groups and each group will have a task. Said Padden, "we are not going to survey just the students; we will look at our football program and evaluate it, talk with other colleges who have dropped football and whatever else we have to do."

## Advocacy Notes

### Dial a teacher?

by Merv Garretson

Some time ago Jack Gannon shared with me an Associated Press newspaper story clipped from a New York newspaper by Taras Denis of the New York School for the Deaf at White Plains.

In brief, "Dial-A-Teacher" is an experimental program created by the United Federation of Teachers, being piloted in 17 public schools in the Bronx, Manhattan, Brooklyn and Queens boroughs by New York City. Five elementary school teachers take calls from 4 to 7 p.m. at the Union headquarters three days a week from children having trouble or questions about their homework assignments.

The Dial-A-Teacher team includes specialists in reading and mathematics, and one is an English-Spanish bilingual. According to Albert Shanker, UFT president, it is hoped this service "will begin to bridge the gap between home and school by encouraging parents to help their kids with homework and providing professional answers to questions many parents long out of school may have about specific assignments."

Shanker indicated the teachers will give help in getting students to figure out how to do the problems, not do their homework for them. The program is designed to assist both students and parents. A similar service is provided by the Philadelphia Board of Education.

Mr. Denis' cryptic comment on the clipping was "... and us?" As usual, mainstreamed deaf students are left out as they can't hear to dial a teacher, and the same thing goes for deaf parents.

Deaf students in large day and residential schools for the deaf have had this kind of service across the years, but once again mainstreaming advocates have forgotten that the deaf child doesn't hear.
